OPERATION AND AGRICULTURE SUPPLY INFORMATION SYSTEM (OASIS)

COMPANY OVERVIEW

Operation and Agriculture Supply Information System, LLC is a private company in the state of Maryland, providing its title product (a computer software application) designed specifically for the agriculture industry. The OASIS team develops, supports, promotes, and distributes the software product to a worldwide market. With its comprehensive database that spans the agricultural production cycle from planting through farming to post harvest and shipping, OASIS provides data analysis and business support services to small, medium, and large farms.

VISION

The vision is a systematic method and process that farmers can use to collect and analyse all of their agricultural data including environmental data, so that they can both plan and produce a bountiful harvest for their family, community, and the population at large, and most importantly will be better positioned to conserve natural resources for future generations.

MISSION STATEMENT

The mission is to make the OASIS product a market leader in providing a cloud-based Software-as-a-Service (SaaS) Enterprise Resource Planning (ERP) system for the agriculture industry. With the OASIS product, any farmer anywhere in the world will have an affordable and sophisticated tool to make accurate decisions on planning and managing agricultural production. With the continued use of the OASIS product year after year, there will be improved business processes and cost-effective use of farm inputs that lead to increased harvest yields.

OASIS STANDARD AND ENTERPRISE EDITIONS PRICING, PARTIAL LIST

SKU	Product	Regular Price
OSE1A0165	Standard Edition Core Package, 5 Users, 1 Year Subscription	\$210
OSE4A0165	Standard Edition Full Package, 5 Users, 1 Year Subscription	\$1,218
